SUMMARY

Software Engineer with hands-on experience in software development, debugging, and building backend-driven applications. Strong foundation in programming fundamentals, data structures, and problem-solving, with experience in developing, testing, and integrating scalable systems. Familiar with system-level concepts, API-driven architectures, and database-backed applications. Quick learner with a proactive mindset, eager to work with low-level programming concepts, RTOS fundamentals, and performance-critical software systems.

SKILLS

Programming & Core Concepts: C, C++ (basic understanding), Data Structures & Algorithms, Programming logic, control structures

Software Development & Debugging: Software programming & unit testing, Debugging and bug fixing, Writing clean, maintainable and well-documented code, Understanding of software development lifecycle (SDLC)

Web & Application Development: React.js, JavaScript, HTML5, CSS3, Bootstrap, PHP, Laravel, Node.js, Python

Databases: MySQL, MongoDB, Supabase, SQL queries, data validation, schema understanding

Tools & Platforms: Git & GitHub, VS Code, XAMPP, Debugging & testing tools (IDE-based)

PROJECTS

RUBBER ECO

Tech Stack: React.js, Node.js, Express.js, MongoDB, Python

- Analyzed operational data related to task scheduling, worker assignments, and service progress.
- Designed structured datasets to track user activity, tasks, and performance metrics.
- Applied data cleaning and aggregation techniques to support decision-making.
- Developed backend logic to process and manage data efficiently.
- Built dashboards and interfaces that presented data insights clearly to users.
- Demonstrated understanding of the data science lifecycle from data collection.

SMARTPHONE GALAXY STORE

Tech Stack: HTML, CSS, JavaScript, jQuery, PHP, Bootstrap, MySQL

- Built a database-driven e-commerce application using Core PHP and MySQL.
- Implemented backend logic for sales, products, and user management.
- Handled form submissions, validation, and secure data storage.
- Gained experience with real-world transactional data and backend workflows.

FRESHWAVE (Laravel)

Tech Stack: Laravel (PHP), MySQL, Blade, Bootstrap

- Designed and implemented relational database schemas using MySQL.
- Developed backend logic using Laravel MVC architecture.
- Implemented CRUD operations, data validation, and optimized SQL queries.
- Managed user authentication and role-based access.
- Improved application performance through structured queries and clean backend logic.

WEATHER FORECAST APPLICATION

Tech Stack: React.js, Python, OpenWeather API, Supabase (Authentication)

- Developed a full-stack weather application using React.js (frontend) and Python (backend).
- Integrated OpenWeather API to fetch and display real-time weather data based on search input.
- Implemented email-based authentication using Supabase Auth, enabling secure user login.
- Handled API error cases, data validation, and response formatting for reliable application behavior.
- Gained hands-on experience with REST APIs and authentication workflows

EDUCATION

AMAL JYOTHI COLLEGE OF ENGINEERING (AUTONOMOUS) 2026 | Kottayam, India
MASTER OF COMPUTER APPLICATIONS (MCA)- CGPA: 8.13/10

ST. GEORGE'S HIGHER SECONDARY SCHOOL, MANIMALA 2020 | Kottayam, India
HIGHER SECONDARY EDUCATION (SCIENCE) - CGPA: 8.01/10

CARDINAL PADYARA PUBLIC SCHOOL, MANIMALA 2018 | Kottayam, India
SECONDARY EDUCATION (CBSE)- CGPA: 7.67/10

EXPERIENCE

NESTSOFT, Kochi

Python | Django | REST APIs | MVC Architecture | Internship (1 Month)

- Worked with Python and SQL for backend and database-driven development.
- Performed data extraction, transformation, and validation from relational databases.
- Implemented CRUD operations using structured SQL queries.
- Assisted in query optimization and database performance improvements.
- Participated in testing and debugging backend logic to ensure data accuracy.
- Collaborated with team members to understand system data flow and database interactions.

SKILL VERTEX, Bengaluru

Web Development Internship | HTML | CSS | Server-side Scripting | Database | 1 Month

- Built backend-supported web modules using HTML, CSS, server-side scripting, and databases.
- Worked with database storage, retrieval, and validation logic.
- Assisted in testing, documentation, and deployment activities.
- Improved understanding of real-world application workflows and database usage.

CERTIFICATIONS

Generative AI Certified Professional | Oracle Cloud Infrastructure 2024

- Recognized by Oracle Corporation, Valid until July 29, 2026

Python 101 for Data Science | IBM / Cognitive Class Python for Data Science

- Focused on basics of python

NPTEL | IIT Madras | 4 week course

- Focused on Python, data analysis, and visualization

ACHIEVEMENTS

- Participated in the GDG On Campus Solution Challenge 2025 Bootcamp, gaining exposure to problem-solving, teamwork, and solution-oriented thinking in a collaborative environment.
- Served as a Student Council Member, representing the student body in decision-making processes, coordinating with faculty and peers, and strengthening communication.
- Volunteered at the NASA Space Apps Challenge, assisting in event coordination, and cross-team communication, demonstrating professionalism, teamwork, and organizational skills.
